Continuation of Substance of Interview including description of the general nature of what was discussed:

Issues discussed were those related to placing the claim in condition for allowance.

It was noted that claim 12 is an apparatus claim, reciting a web-based system; however parts (b) and (c) of claim 12 recite data elements rather than structural elements. It was suggested that the claim be amended to recite structure, providing there is support for this in the originally filed specification.

Also noted were some typographical errors in claim 12.

Examiner will reconsider the application in light of amendments made that clarify the claims.
